I am a junior fullstack developer with a passion for creating dynamic and efficient web solutions. I specialize in both frontend and backend development, using modern technologies to deliver smooth user experiences and robust systems. My focus is on continuous learning and adding value to the projects I work on, always striving to improve my skills and adapt to the client's needs.

PERSONAL EXPERIENCE

No Violence Forum   **Armenia,Colombia**
FrontEnd   *September 2024–October 2024*

- Developed and optimized the user interface for a web platform of a no-violence forum, improving navigation and accessibility for users.
- Developed and optimized the user interface for a web platform of a no-violence forum, improving navigation and accessibility for users.
- Worked on designing a scalable and maintainable frontend architecture, ensuring the site was functional and visually appealing across various devices and browsers.

Personal Project: Rick and Morty API   **Armenia,Colombia**
Frontend   *July 2024–August 2024*

- *Developed a frontend application using the Rick and Morty API, showcasing characters, episodes, and locations in an interactive and dynamic interface.*
- *Designed an intuitive, responsive user interface using React.js, HTML5, CSS3, and JavaScript, ensuring a seamless experience across both mobile and desktop devices.*
- *Integrated multiple API endpoints to display detailed information about characters, episodes, and locations, ensuring smooth navigation between the app's different sections.*
- *Implemented a search system that allowed users to quickly find specific characters and episodes, reducing search time by 30%.*
- *Facilitated efficient image loading by optimizing sizes and formats, resulting in a 25% reduction in page load time.*

EDUCATION

KAMBCODE   **Armenia,Colombia**
Full stack software development with an emphasis on JavaScript   *November 2024*
